

Hello! I'm TAIYABA

Birthday: Jan 10th 2002

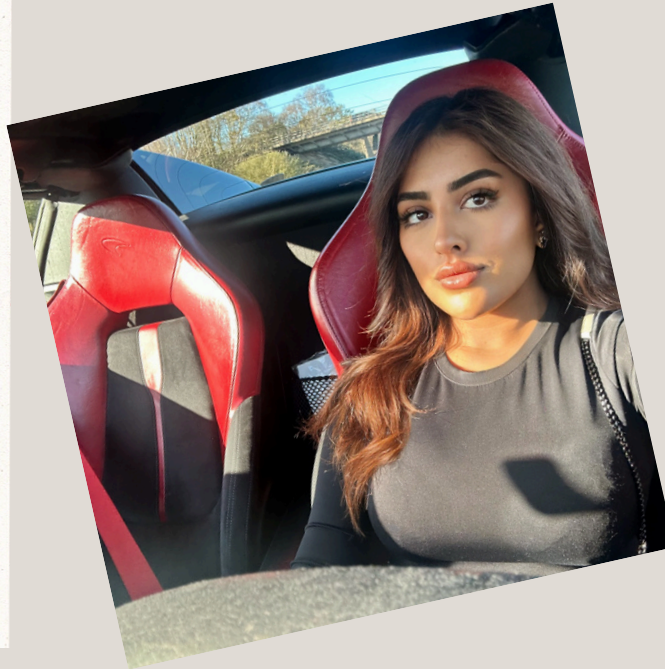

Zodiac Sign: Capricorn

ABOUT ME

I didn't follow a traditional path — and that was intentional.

I grew up in London and attended a private all-girls school where the expected route was clear: excel academically, attend a top university, graduate, enter a corporate profession, and work your way up within someone else's system.

Even then, I knew that wasn't the life I wanted.

EARLY ON

At 17, while studying my A-levels, I began working to understand independence early. Shortly after, I discovered tutoring — starting with a single student. What began as a way to earn money quickly became something far more meaningful: control over my time, my income, and my direction.

Over the last six years, I've built a fully self-employed tutoring business from the ground up:

- *Working 1–1 with over 100 students*
- *Operating almost entirely through referrals and demand*
- *Charging up to £100 per hour*
- *Remaining consistently booked across different academic stages (11+, GCSE, A-level)*

At the same time, I began learning about trading. I made my first trade at 18. Early wins showed me the potential, but just as importantly, early losses taught me discipline. Over time, I developed a risk-first, education-led approach — understanding that longevity matters more than short-term gains.

By 2025, after years of balancing long tutoring hours, trading, and academic study, I reached a point of burnout. That was when I made the decision to move to Dubai — not to escape work, but to redesign how I worked.

Alongside building my business, I completed both:

- *An LLB (Law degree)*
- *A Master's in Law, including preparation for the SQE*

These qualifications gave me discipline, structure, and analytical thinking — but I ultimately chose not to pursue a legal career. I had already built something that worked, and I wasn't willing to trade independence for a conventional salary.

My experience across tutoring and trading taught me one core principle:

Income is most powerful when it's built on skill, structure, and independence — not shortcuts.

TODAY:

- *Maintain my UK tutoring business online*
- *Work with students both in London and Dubai*
- *Trade independently with a disciplined approach*
- *And finally have the space to teach others how to build sustainable, skill-based income*

Learn & Earn exists because I know what it's like to:

- *Want more than the traditional path*
- *Build something without a blueprint*
- *And value freedom as much as income*

This isn't about quick wins or overnight success. It's about building something that lasts — on your own terms.

Everything I teach is built on real execution — not theory, not shortcuts, and not content trends.

TABLE OF CONTENTS

01

(PAGE 3)

Introduction: Learn & Earn

An overview of Learn & Earn, why it exists, and the philosophy behind building skill-based income instead of relying on unstable or traditional paths.

02

(PAGE 4)

Vision, Mission & Values

The core principles behind everything taught: skill over shortcuts, consistency over motivation, and long-term independence over quick wins.

03

(PAGE 5)

How the Programme Works

A step-by-step breakdown of onboarding, strategy calls, documents, and 1-1 sessions so you always know what comes next.

04

(PAGE 6)

The Two Pathways

An overview of the Tutoring and Trading pathways, who each is for, and what success looks like in both – without treating them as linked or dependent.

05

(PAGE 7)

Guided vs Self-Guided Options

A clear explanation of the difference between self-guided and guided pathways, including what support is included and who each option is best suited for.

06

(PAGE 8)

Investment Breakdown

A breakdown of pricing, support levels, and how each pathway converts into long-term earning capacity or capital protection rather than short-term outcomes.

07

(PAGE 9)

FAQs & Next Steps

Answers to common questions and guidance on booking a 1-1 strategy call to determine the most suitable pathway.

Last Updated:	Dec 29, 2025

I hold both a degree and a master’s in law — yet neither of these qualifications played a role in building the income or lifestyle I have today.

I built Learn & Earn after repeatedly seeing capable, intelligent people stuck between unstable income and careers that drained their time, energy, and autonomy — despite doing everything they were told was “right”.

<u>1-1 Tutoring</u>	<u>Trading</u>
I have been tutoring for 6 years , working directly with students and families on a 1-1 basis.	I have been trading for 5 years , with an approach that is education-based and discipline-led.
My work focuses on structuring knowledge into sustainable income, and over time I developed clear, repeatable systems around: • Choosing profitable subjects and age groups • Structuring and pricing sessions with confidence • Delivering high-quality lessons that lead to long-term clients and referrals • Managing time, boundaries, and scalability without burnout	I do not rely on signals, hype, or copying others. Instead, my focus is on: • Understanding how markets actually move • Risk management and capital protection • Emotional control & consistency. • Building independence through competence, not dependency.
This pathway is for individuals who want to turn existing skills or academic strengths into a structured 1-1 tutoring business — without needing a teaching degree or large start-up costs.	I work with individuals who want to understand every trade they take, manage losses without emotional disruption, and scale only once consistency has been achieved. Trading is treated as a skill to be learned over time, not a shortcut to income. (This programme is educational and does not constitute financial advice.)

VISION	MISSION	VALUES
Build skill-based income streams, not short-term fixes	Teach practical, repeatable systems that can be applied independently	Skill and consistency over shortcuts or short-term motivation
Create control over time, income, and long-term direction	Enable individuals to build a profitable 1–1 tutoring business or develop real trading skills grounded in discipline and risk management	Clarity and simplicity over unnecessary complexity
Focus on realistic, sustainable growth without relying on traditional employment or unrealistic promises	Support long-term independence through competence, not hype	Long-term independence over quick wins or dependency

Communication and support

When you work with me, you’re not left figuring things out alone.

1–1 Support	Private Telegram access	Structured Guidance
Personalised sessions tailored to your specific goals and starting point	Direct access via Telegram for questions between sessions	A clear pathway outlining what to focus on at each stage
Between-session Support (Telegram)	Clarification on concepts when you’re applying them in real time	Practical frameworks to avoid common mistakes and wasted effort
Clear Frameworks & Next Steps	Ongoing check-ins to keep momentum between calls	Defined next steps so you’re never guessing what to do next

How to start?

STEP 1	STEP 2	STEP 3
Click the link below to schedule a 1-1 strategy call .	Once onboarding is done, you will receive your Starter Documents .	Begin personalised 1-1 sessions with me
We will speak through the pathways and which one suits you best.	These documents will help you to: • Understand the pathway you've chosen • Prepare properly before your first session • Begin taking action with clarity, not confusion	These sessions will be tailored to: • Your goals • Your starting level • Your pace
The call will be 45 minutes.	This ensures your time is used effectively from day one.	Each session builds on the last, with defined next steps so you always know what to focus on before your next call.

Request a 1-1 strategy call

If you proceed with a pathway, the cost of your 1-1 strategy call will be deducted from the total programme fee.

One Philosophy, Two Independent Paths

Tutoring and trading are not interlinked, but both are built on the same core principles:

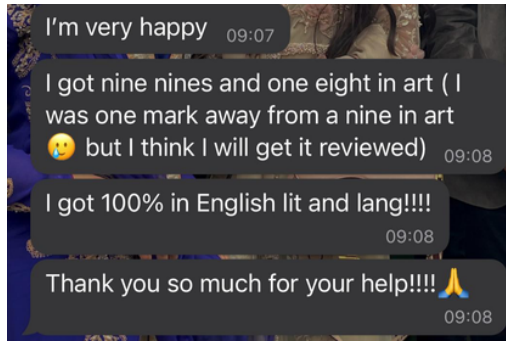

- Skill over shortcuts
- Consistency over motivation
- Clarity over complexity
- Long-term independence over quick wins

Each pathway can be pursued independently, depending on your goals, time, and capacity.

Learn more about the two pathways below.

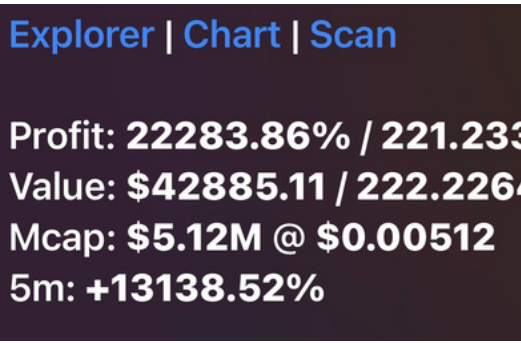

The pathways

(Guided).

Not sure which path fits you?
Book a strategy call and we'll map it properly.

<u>Build Your Own 1–1 Tutoring Business</u>	<u>Become Independent in Trading</u>	<u>Private Mentorship (8 spaces per month)</u>
Turn your knowledge into paid 1–1 income — without a teaching degree or startup costs.	Trade with structure and discipline — using systems and automation to reduce emotional mistakes.	This is for people who want fewer mistakes, faster execution, and direct involvement — not trial and error.
• Turn knowledge into paid 1–1 tutoring • Attract consistent clients (not one-offs) • Price confidently without undercharging • Build income that fits your schedule	• Understand how markets actually move • Trade with risk control and discipline • Build consistency before scaling • Stop relying on signals or hype	• Direct access to me for decisions, strategy, and execution • Personalised plan adjusted in real time • Accountability between sessions (not just during calls) • Priority support & feedback when it actually matters.
<u>Client Acquisition (Education & Guidance)</u> • How to find clients actively searching for tutors • Where to post and how to position yourself • What to say in outreach and enquiries • You set up and manage the process yourself	<u>Trading Bot (Education & Setup Guidance)</u> • Full explanation of how the trading bot works • Guidance on where and how to set it up • Understanding parameters, risk limits, and rules • You configure and run it yourself	<u>Trading Bot (Hands-On Configuration & Oversight)</u> • Bot configured with you via shared screen • Settings tailored to your risk tolerance and capital • Clear rules for when to intervene vs leave it running • Ongoing adjustments as your strategy develops <u>Tutoring Platform & Systems (Hands-On Setup)</u> • 1–1 screen-share to set up your tutoring platform • Help structuring your subject, pricing, and offers • Walkthrough of enquiry handling and onboarding • Support as your setup evolves <u>Telegram Access</u> Private Telegram access for ongoing insights, market observations, and opportunities I am actively analysing + Alpha plays.
<u>What Success Looks Like</u> • Consistent weekly income • £40–£90+ per hour potential • Long-term clients instead of one-offs • Control over your time and schedule • Fully booked calendar	<u>What Success Looks Like</u> • You understand every trade you take • Losses don't destroy your mindset • Consistency before profitability • Independence from signals or copying others	<u>What success looks like</u> This is not teaching — it's decision support: • You stop second-guessing • You execute faster and cleaner • You avoid common (and expensive) mistakes • You build confidence through action, not theory
4 × 1–1 sessions (60 mins each) Includes: Structured onboarding document Personalised 1–1 support Exclusive Telegram access between sessions	5 × 1–1 sessions (60 mins each) Includes: Foundations → execution → independence Risk management & psychology Personalised feedback Exclusive Telegram access between sessions <i>(Trading involves risk. This programme is educational and does not constitute financial advice. Results vary based on effort, discipline, and application.)</i>	8 × 1–1 sessions (60 mins each) Includes: • Ongoing support between sessions • Tailored to your situation only • Limited availability • I am involved in real-time
 £990 total	 £1,500 total Due to the psychological and risk-based nature of trading, guided support is strongly recommended for beginners.	 £3900 total

Self-guided vs Guided

Self-Guided For individuals who prefer to work independently, a structured document-only option is available.	Document-only pathway available	Tutoring: £399 Trading: £599
Guided	1-1 sessions with ongoing Telegram support	Tutoring: £990 Trading: £1,500 - £3900

Extension Sessions - continue working together

- +2 sessions: **£350**
- +4 sessions: **£690**

Payment confirms your place and onboarding details are sent immediately after.

The right option depends on how you prefer to learn, your level of experience, and the amount of support you want during implementation.

Tutoring — Self-Guided (£399)

This pathway is ideal if you want to build or refine a 1–1 tutoring business independently.

Includes:

- **A structured tutoring framework covering:**
 - How to position yourself as a tutor
 - Pricing and session structure
 - Client acquisition and retention principles
 - Creating consistency and long-term income
 - Turning tutoring hours into a repeatable system
 - Clear explanations designed to be implemented at your own pace

Does not include:

- 1–1 sessions
- Personalised feedback
- Direct support with client acquisition setup
- Review or optimisation of parent-facing profiles
- Messaging or Telegram support

The self-guided pathway focuses on understanding systems and principles.

Implementation support is provided as part of the guided pathway only.

This option is best suited to individuals who are disciplined, self-directed, and confident implementing systems without oversight.

Trading — Self-Guided (£599)

This pathway focuses on understanding trading properly, with an emphasis on risk awareness, execution principles, and discipline.

Includes:

- **Education on:**
 - Trade structure and execution logic
 - Risk management principles
 - Trading psychology and discipline
 - Understanding why most losses occur
- Conceptual understanding of execution safety, including:
 - Why MEV protection matters
 - Why unsafe contracts and honeypots are a risk
 - Why rules and structure are essential

Does not include:

- Bot setup or configuration
- Execution tooling support
- Personalised trade feedback
- Signals, copy trading, or guarantees

The self-guided trading pathway is educational in nature and is best suited to individuals who want to understand trading concepts and frameworks before applying them independently.

Your Investment breakdown

**This is not about making money once.
It’s about never being stuck again.**

TUTORING	TRADING
Turning Hours Into Systems	Protection, Precision, and Control Trading is not about speed or shortcuts. It is about having the right tools, rules, and protections in place.
Most tutors charge £50–£90+ per hour. <i>(This varies based on your age/experience/qualifications/ track record etc.)</i>	Most people lose money not because trading doesn’t work, but because they: • Enter too late • Use unsafe contracts • Get caught by MEV or honeypots • Trade without execution rules This programme focuses on avoiding those mistakes.
At a modest £60 per hour, you would recover: £399 in ~7 hours £800 in ~16.5 hours That is a handful of sessions Or one consistent client over 1–2 weeks	You will be supported in: • Setting up and configuring trading bots with MEV protection • Entering positions earlier and more efficiently • Identifying and avoiding honeypots and unsafe tokens • Implementing risk management rules before trading No prior technical experience is required — setup is guided step by step.
This programme is not about earning once. It is about building a repeatable system that continues to generate income week after week.	You are not paying for: • Signals • Copy trading • Guaranteed returns You are paying to: • Trade independently with protection • Execute with confidence and control • Avoid preventable losses
This is not £800 spent. It is £800 converted into long-term earning capacity.	Most losses are avoidable. This programme is designed to help you avoid them.

FAQs

Here are some commonly asked questions about onboarding customers and what to do:

Question	Answer
Is this group-based or 1-1?	You'll receive 1-1 support , alongside exclusive access to me via telegram for ongoing questions, guidance, and learning.
Do I need prior experience to start?	No. Both paths are designed for beginners. Everything is taught from the ground up, with structure and clarity – not assumptions.
Can I do both tutoring and trading?	Yes. Some people start with one, others choose both. You'll be guided based on your goals, time, and capacity.

Next Steps

If you are wanting to proceed, the next step is to book a 1-1 strategy call.
(This call is required before you proceed so we can discuss your options together and make an informed decision)

This call is designed to:

- Understand your goals, experience, and capacity
- Walk through the available pathways
- Recommend the most suitable option for you

Please note:

- The strategy call fee is non-refundable
- If you proceed with a pathway or purchase a self-guided document, the full cost of the strategy call will be deducted from your total

This ensures your time is used intentionally and your next steps are clear before committing.
